# SAHIL RAJPUT

## Full Stack Developer

Panchkula/Chandigarh, INDIA

## EDUCATION

10/2020 – 12/2020

### Dev Ops With Docker

University of Helsinki, Finland.

3 ECTS course.

#### Achievements/Tasks

- Completed FullStackOpen Course remotely at <https://devopswithdocker.com>
- Set up orchestration for real world ready-made projects with connecting setup using `docker-compose` tool.
- Managing resources for different containers.
- Set up custom nginx image with scaled containers for load-balancing.

06/2019 – 12/2019

### FullStack React/React Native Developer Course

University of Helsinki, Finland.

12 ECTS course.

#### Achievements/Tasks

- Completed FullStackOpen Course remotely at <https://fullstackopen.com>
- Made several full stack applications with React/React Native, Expressjs, MongoDB and GraphQL during the course like fully feature phone book app with logic authentication via express.js and mongodb for data storage for the users.
- Done several testing related exercises for frontend as well as backend with nodejs.
- Made a intermediate level react-native app for browsing github profiles, reviewing them, rating personal repos and adding comments in them with supported backend.
- Finished git course during the course as well @ <https://learnitbranching.js.org>.

2015 - 2019

### University Institute Of Engineering & Technology , Panjab University

Bachelor of Engineering - Information Technology

## WORK EXPERIENCE

---

### Nubit (Mobin Signity Solutions Pvt Ltd) - Android Developer(Java)

June 2018 – August 2018

Profile - Native Android Developer for Calvry™

Published - <https://tinyurl.com/calvry-playstore>

Product : Calvry is an AI based FOOD recognition app that intelligently detects your food items and allows user to know all the nutritional values of your foods.

Responsibilities:

- During the internship period as a native android developer, I worked for developing calvry that intendedly worked very well. The app was designed with the aim of optimizing bandwidth considering the features, thus making it bandwidth friendly, fast and efficient.

## LANGUAGES

---

## SKILLS

---

- Good communication - written and oral skills
- Excellent conceptual and analytical skills.
- Effective interpersonal skills.

## PERSONAL PROJECTS

---

- Services:
  - o Axios playground - <https://axiosplayground.ml/>
  - o Object Database Server - <https://jsonbackendserver.herokuapp.com/>
  - o Query graphql apis with power - <https://abstraction.ml/> (using OneGrahps Client )
- Npm packages published on npm/yarn:
  - o *useWhat* – react global state management
  - o *useStateM* – a mutable useState hook (using immerjs)
  - o *mongo-quick* – extension library using mongoosejs
  - o *jsonbackend* – A true object database server
  - o *react-fetch2* – Easy inbuilt fetching mechanism for react/react-native
  - o *useEffectFactory* – Power up verbose namings for useEffect usecases in react.
  - o *pagelist-react* – Setup routes with react on the fly.
